

SUMMARY OF ANNEX 23: OVERVIEW OF IT-INFRASTRUCTURE

Universitas Pendidikan Indonesia has a strong and integrated information technology infrastructure, as the main support in the implementation of the tridharma of higher education and institutional governance. Information technology service policies and standards have been listed in the [UPI Quality Standards document](#), especially in the Information System section which can be further reviewed on pages 67–84. As a form of digital transformation and service efficiency, UPI has developed a Smart Management System (SMS) which can be accessed through the portal <https://sms.upi.edu>. This portal functions as an academic and administrative control center for all academicians.
